

AMMONIA DETECTOR

CODE: HK-AMDT

The Ammonia Detector is a high-precision sensor designed to monitor ammonia (NH_3) levels in restroom environments. It also monitors temperature and humidity with exceptional accuracy, making it a reliable tool for comprehensive environmental sensing. Ideal for maintaining air quality and safety.

AMMONIA (NH_3)

Detection Range: 0-100 ppm

MEASUREMENT ACCURACY

0.01 ppm

TEMPERATURE

Detection Range: -40°C to 125°C

DATA READING FREQUENCY

Platform-configurable monitoring interval

HUMIDITY

Detection Range: 0 - 100%RH

DIMENSIONS

56.5 × 56.5 × 19 mm
